

Longitude IP Access Control

Client Feature List

Longitude IP Access Control (IPAC) is an open platform, enterprise level IP-based access control solution with features that include alarm monitoring, graphical maps, automation, reporting, photo ID badge creation, visitor logging, and IP connectivity directly to the door with the latest open source readers from the industry's leading edge manufacturers.

Like all DVTel software-based solutions, Longitude IPAC is a multi-vendor software platform that works natively with numerous popular brands of access control hardware including access control panels and readers. Longitude ensures freedom of choice—you are not locked into proprietary access control hardware.

Longitude IPAC provides a wide range of features, unequalled reliability, unlimited scalability, and the best price and performance in the industry.
